

Enrico Bessa

Junior Software Developer

Belo Horizonte, Brazil | +55 31 99948-1929 | enricobessa@gmail.com | linkedin.com/in/enricobessa | github.com/EnricoBessa | Portfolio: enricobessa.github.io/EnricoBessaPortfolio

SUMMARY

Software Engineering student at PUC Minas (expected graduation 2026) with 2+ years of hands-on experience in software development and data analysis. Currently a Software Development Intern at DTG Consulting, building back-end features and REST APIs in C#/.NET integrated with SQL Server and MySQL databases. Upper-intermediate English. Seeking a Junior Developer or internship role to grow as a full-stack engineer.

PROFESSIONAL EXPERIENCE

Software Development Intern - DTG Consulting and Projects

Belo Horizonte, Brazil | Apr 2024 - Present

- Develop back-end features in C# and .NET for internal business systems used daily by the team
- Build and maintain REST APIs integrating internal systems with SQL Server and MySQL databases
- Maintain, debug, and improve legacy systems, reducing recurring issues for the team
- Collaborate in a team environment using Git version control

Data Analyst Intern - EMATER-MG

Belo Horizonte, Brazil | Apr 2023 - Mar 2024 (1 year)

- Wrote Python scripts for data management and maintenance of internal systems
- Provided IT support, resolving user and infrastructure incidents
- Performed data analysis to support the team's operational decision-making

EDUCATION

B.S. in Software Engineering - PUC Minas

2023 - 2026 (expected)

IT Technician Certificate - Cotemig School

2020 - 2022

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, PHP

Frameworks and Libraries: .NET, React, Flutter

Databases: SQL Server, MySQL

Web: HTML5, CSS3, REST APIs

Tools: Git, GitHub, computer networks and architecture

Spoken Languages: Portuguese (native), English (upper-intermediate)

PROJECTS

- **Portfolio Website** — Personal portfolio built to showcase projects, skills, and professional experience. Built a modern, responsive interface for desktop and mobile devices, using reusable components and a modular structure. The project supports multiple languages through **i18next** and was built with **React and Tailwind CSS**. **GitHub:** <https://github.com/EnricoBessa/EnricoBessaPortfolio>
- **SDG Criativa** — E-commerce platform for custom products, built for a real client and used in production. Built a complete application with product catalog, shopping cart, and order checkout via WhatsApp, plus an admin panel for managing products and categories. Used **React, TypeScript, Firebase, Cloudinary, and Vite**, with a focus on responsiveness, code organization, and user experience.
